THIS IS WHAT C + P CHARGING LOCKERS OFFER

Charging lockers by C + P: Your batteries are kept safe and secure overnight or during work, break or waiting times, and charged at the same time.

Our charging lockers offer plenty of space for storing further utensils such as bags or hard hats safely.

STORAGE SPACE

The individual compartments allow sufficient space for users. The steel material is smooth and easy to clean.

ELECTRIFICATION

Two GS-approved 230V sockets are installed in each compartment and can be used to charge all devices with a standard power connection.

ANTI-THEFT PROTECTION

C+P compartment lockers come with two different, reliable locking systems – so the choice is yours! The standard design comes with a cylinder lock and two keys.

Alternatively, a reliable electronic PIN CODE lock is available. The electronics offer numerous adjustable functions and operating modes for changing or fixed users.

THE BENEFITS OF C+P COMPARTMENT LOCKERS:

- Stable steel construction: sustainable and fire-protected, GS tested
- Top quality processing: easy to use, protects against injuries
- Smooth surfaces: hygienic and easy to clean
- Ample storage space: sufficient space per compartment for batteries and other utensils
- **Double electrification: two 230V sockets per compartment**
- Anti-theft: also available with cylinder or PIN code lock
- Ventilation: a special ventilation solution in the back of the locker promotes optimal heat dissipation
- Flexible use: also suitable for charging other devices such as smartphones, laptops, tablets or other batteries with standard power connection
- Attractive look: available in four modern color types
