

Variability: taking on a whole new dimension C + P Stahlschrank PLUS.

Simply offering more for discerning customers

People needing professional cabinet solutions – whether in their capacity as a dealer or as an end customer – need good reasons to justify their investment too. With the new C + P Stahlschrank PLUS series, we would like to offer you a genuine advantage compared to the usual product benefits available on the market. With this in mind, we have purposefully improved and extended a whole range of features. This guarantees they are state of the art and meet ever-increasing demands – but don't throw tried-and-tested and popular aspects overboard.

Narrow lateral edges for a homogeneous appearance when cabinets are positioned in rows

Our new, added highlights:

- + Bottom part and cabinet base are zinc-plated as standard for increased corrosion protection
- + Improved stability, inspired by nature – the bionic steel frame by C + P: Innovative edge and bending geometries, plus doubled-up material and reinforcements at those all-important points!
- + Resource-conserving use of materials through smart machining of sheet metal
- + All the models are now also available as floor-standing variants
- + Increased space and higher usable capacity thanks to the body height of 1,850 mm
- + What's more, bench versions have a body height of 1,700 mm
- + Narrow lateral edges for a homogeneous, improved appearance when cabinets are positioned in rows
- + Permanently welded storage shelf per compartment
- + Even better ventilation and drying, thanks to additional air vents in the compartment with an optimized flow pattern, which offers a significant advantage above and beyond DIN 4547

BIONIC steel frame by C + P

One thing that all the models have in common is their sturdy design that is reinforced at all the key points, for example, with material that is twice as thick in the front part of the side walls, thicker materials in the partition profiles and box profiles in the bottom parts. To do that, we've incorporated a trick we copied from the natural world: a sophisticated inner structure of folds, supports and spaces increases torsion resistance – much like the leaf of a tree.

Our existing, retained highlights:

- + Sturdy steel construction with high-quality enamel coating
- + Reinforced doors with doorstop silencers for quiet closing
- + Stylish hole patterns or vent slots for optimum ventilation
- + Sturdy changing room rail with anti-rotation sliding hooks
- + Smooth compartment bottom for effortless sweeping

The gold standard: choice × freedom × expandability.

Gone are the days when a steel cabinet first and foremost had to have the right 'height × width × depth' dimensions and be reasonably robust. C + P has been following a more complex path for some time now, and is now consistently continuing along it. We're delighted to have you join us on our journey too!

By putting ourselves in your shoes and having lots of discussions at B2B level, we managed to identify the key requirements that people demand of professional cabinet systems today.

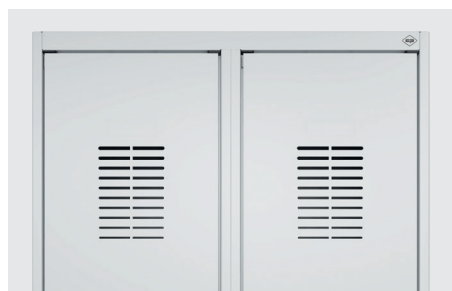

The first requirement is having a real range of solutions to choose from. Secondly, people need the freedom to put forward their own ideas. And, thirdly, they like to be able to flexibly adapt their system to new situations.

We have made all three wishes come true with the modular C + P Stahlschrank PLUS series. With further-developed models, some of which you might already know by name. Continue reading on the following pages to go on a journey of rediscovery.

Reliability × timelessness × simplicity

The new Basis PLUS.

When functionality takes priority, the budget is limited or time is of the essence, the Basis PLUS is your ideal entry-level solution into the new world of steel cabinets. It is particularly ideal for use by the likes of athletes and tradesmen, as it reliably guards their clothes, tools or other items by acting as a locker. It is a superb solution for clubs, small-scale joiners and industrial companies. As a bonus, even the basic models are equipped with useful details, such as label holders for personalization purposes. Customers can also choose between three colors for the doors.

Basis PLUS vent slots

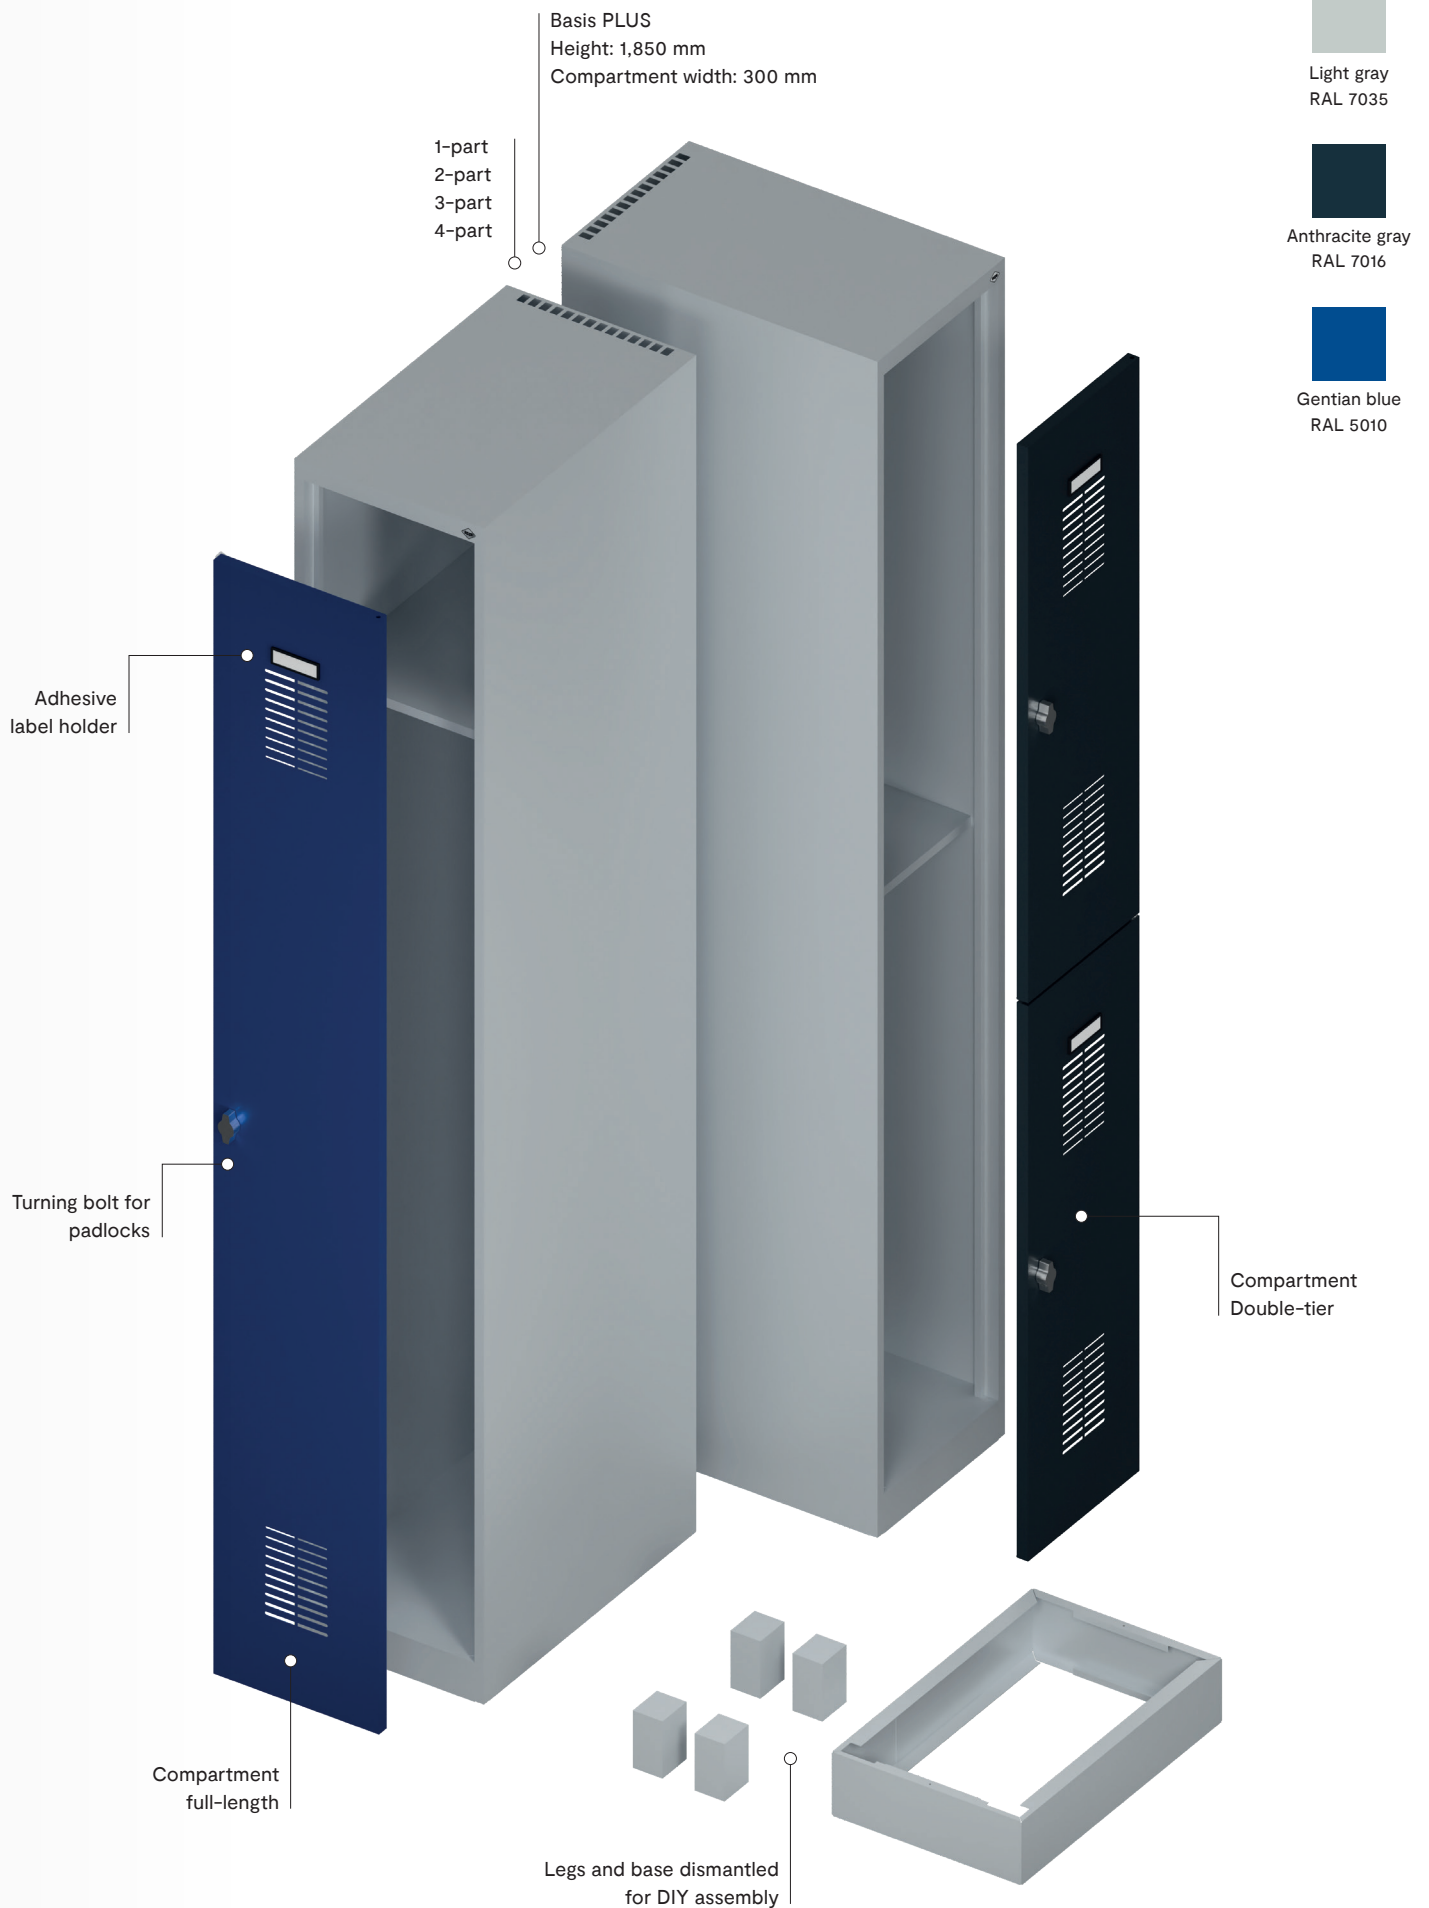

Sturdy changing room rail in gray with 3 anti-rotation sliding hooks

The picture shows the cylinder lock with 2 keys each. The series enables 2 different closing variants in total.

Reliable arguments:

- + The entry-level class: a firm foundation
- + Fast delivery
- + The series includes 8 models to choose from
- + Choice of one, two, three and four compartments and 4, 6 or 8 shelves (double-tier)
- + Compartment heights: 1,850 mm (floor-standing) and 1,950 mm (on legs or a base)
- + Compartment width 300 mm
- + 1 body color and 3 front colors
- + Vent slots at the top and bottom
- + Doorstop silencer with edge protection
- + Permanently welded-in storage shelf and sturdy changing room rail made of oval profile with 3 anti-rotation sliding hooks for each compartment
- + Enclosed adhesive label holder
- + Turning bolt latch or cylinder lock
- + With legs and base dismantled on request for DIY assembly, in light gray
- + Solid steel with break-open resistance class (DIN 4547 A)
- + 3-year manufacturer's warranty

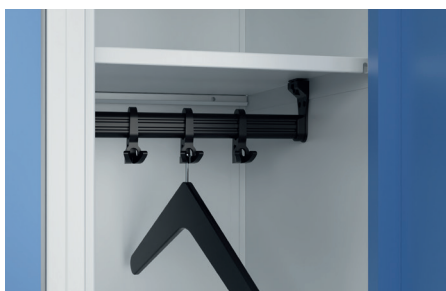

Versatility × safety × utility

The new Classic PLUS.

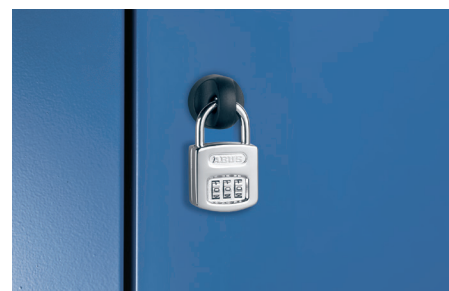

This model proves that even classics can reinvent themselves, as opposed to just riding the retro wave. Many know its predecessor (the C + P Classic) as a safe depository for personal items and valuables – in the likes of companies, schools or museums – and that familiar aspect isn't changing. The new features, however, do include a freshened-up design and a diverse range of combination options and details, some of which catch the eye immediately, and others you only notice a little later. In our opinion, genuine utility is also expressed by the fact that it is repeatedly put to the test and dynamically adapted to new conditions.

Classic vent slots with die-cut label holders

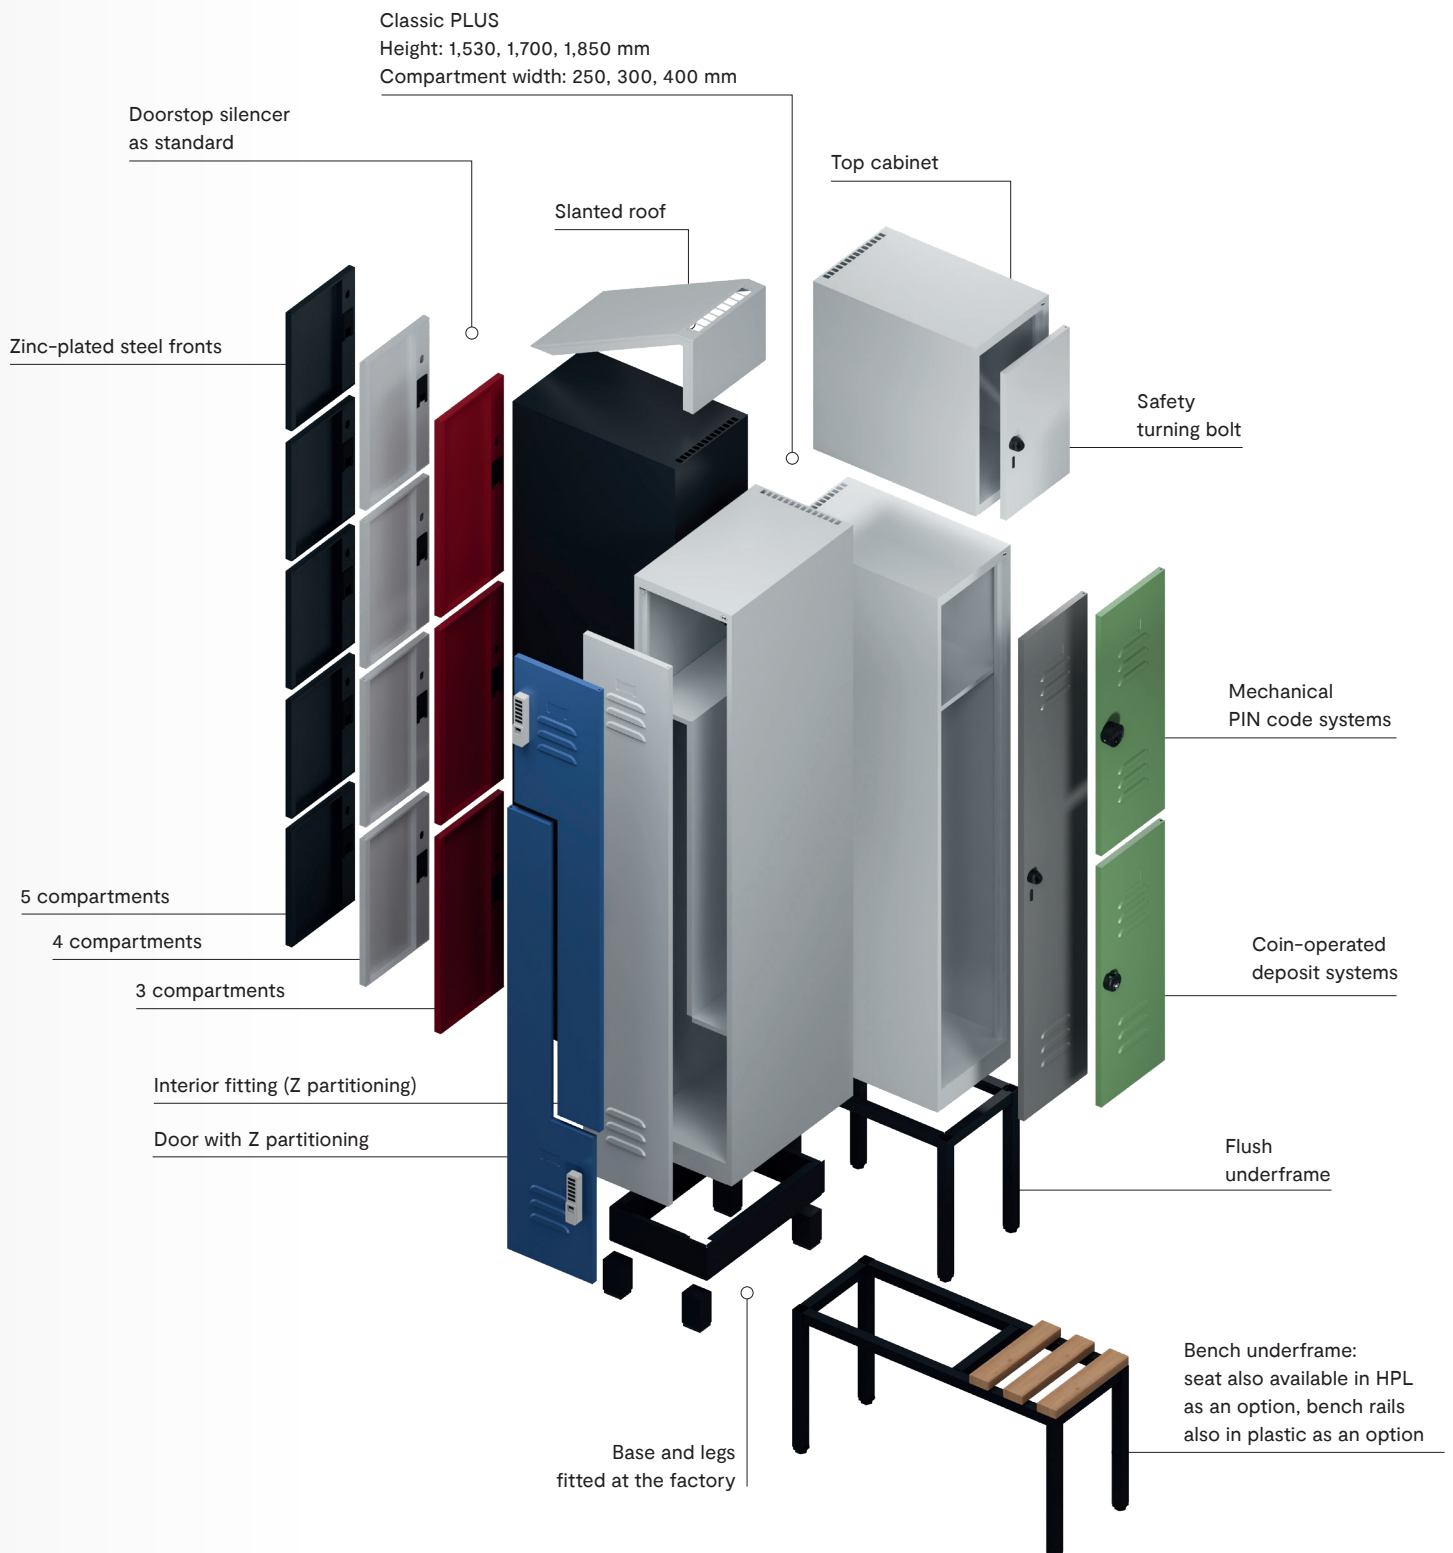

Secure double sliding hooks with hanging option for hotel clothes hangers

The picture shows the safety turning bolt. The series enables 34 different closing variants in total.

Safe arguments:

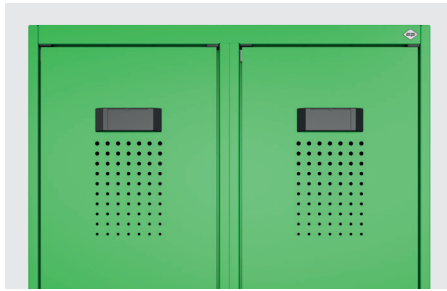

- + The classic with an industrial design
- + A design that is guaranteed to withstand attempts to break it open (DIN 4547 B)
- + The series includes 661 models to choose from
- + Choice of one, two, three and four compartments and between 1 and 5 shelves (on top of each other)
- + Compartment heights: 1,850 mm (floor-standing) and 1,950 mm (on legs or a base)
- + Compartment widths of 250 / 300 / 400 mm
- + Wide range of color design options
- + Classic vent slots
- + Permanently welded-in storage shelf and sturdy changing room rail made of oval profile with 3 anti-rotation double sliding hooks for each compartment
- + Die-cut label holder
- + Special safety turning bolt for padlocks
- + Mechanical deposit and token-operated locks, electronic, battery-powered locking systems, and much more possible
- + Available with bench built underneath the locker or frame for DIY assembly with the cabinet (height adjustable)
- + Also available with factory-fitted legs or base (height-adjustable as an option)
- + Legs in light gray with RAL 7035 as the body color; black gray finish with all other body colors
- + 10-year manufacturer's warranty

Sophistication × value × presence

The new Evolo PLUS.

In this version, which has been given a technical and visual upgrade to take it to the next level, it is the renovated flagship among our models. It is particularly in its element in surroundings where maximum precision and cleanliness are absolutely indispensable – in the likes of laboratories, clinics, research institutes or high-tech forges. Overall, it looks smooth, hygienic and easy to clean. Not just on the outside, but on the inside too. It performs its surprising technical wizardry in an effortless and sleekly understated manner. It is extremely connected and grows along with its tasks – it loves new challenges.

Evolo PLUS stylish ventilation hole pattern with convenient label holder

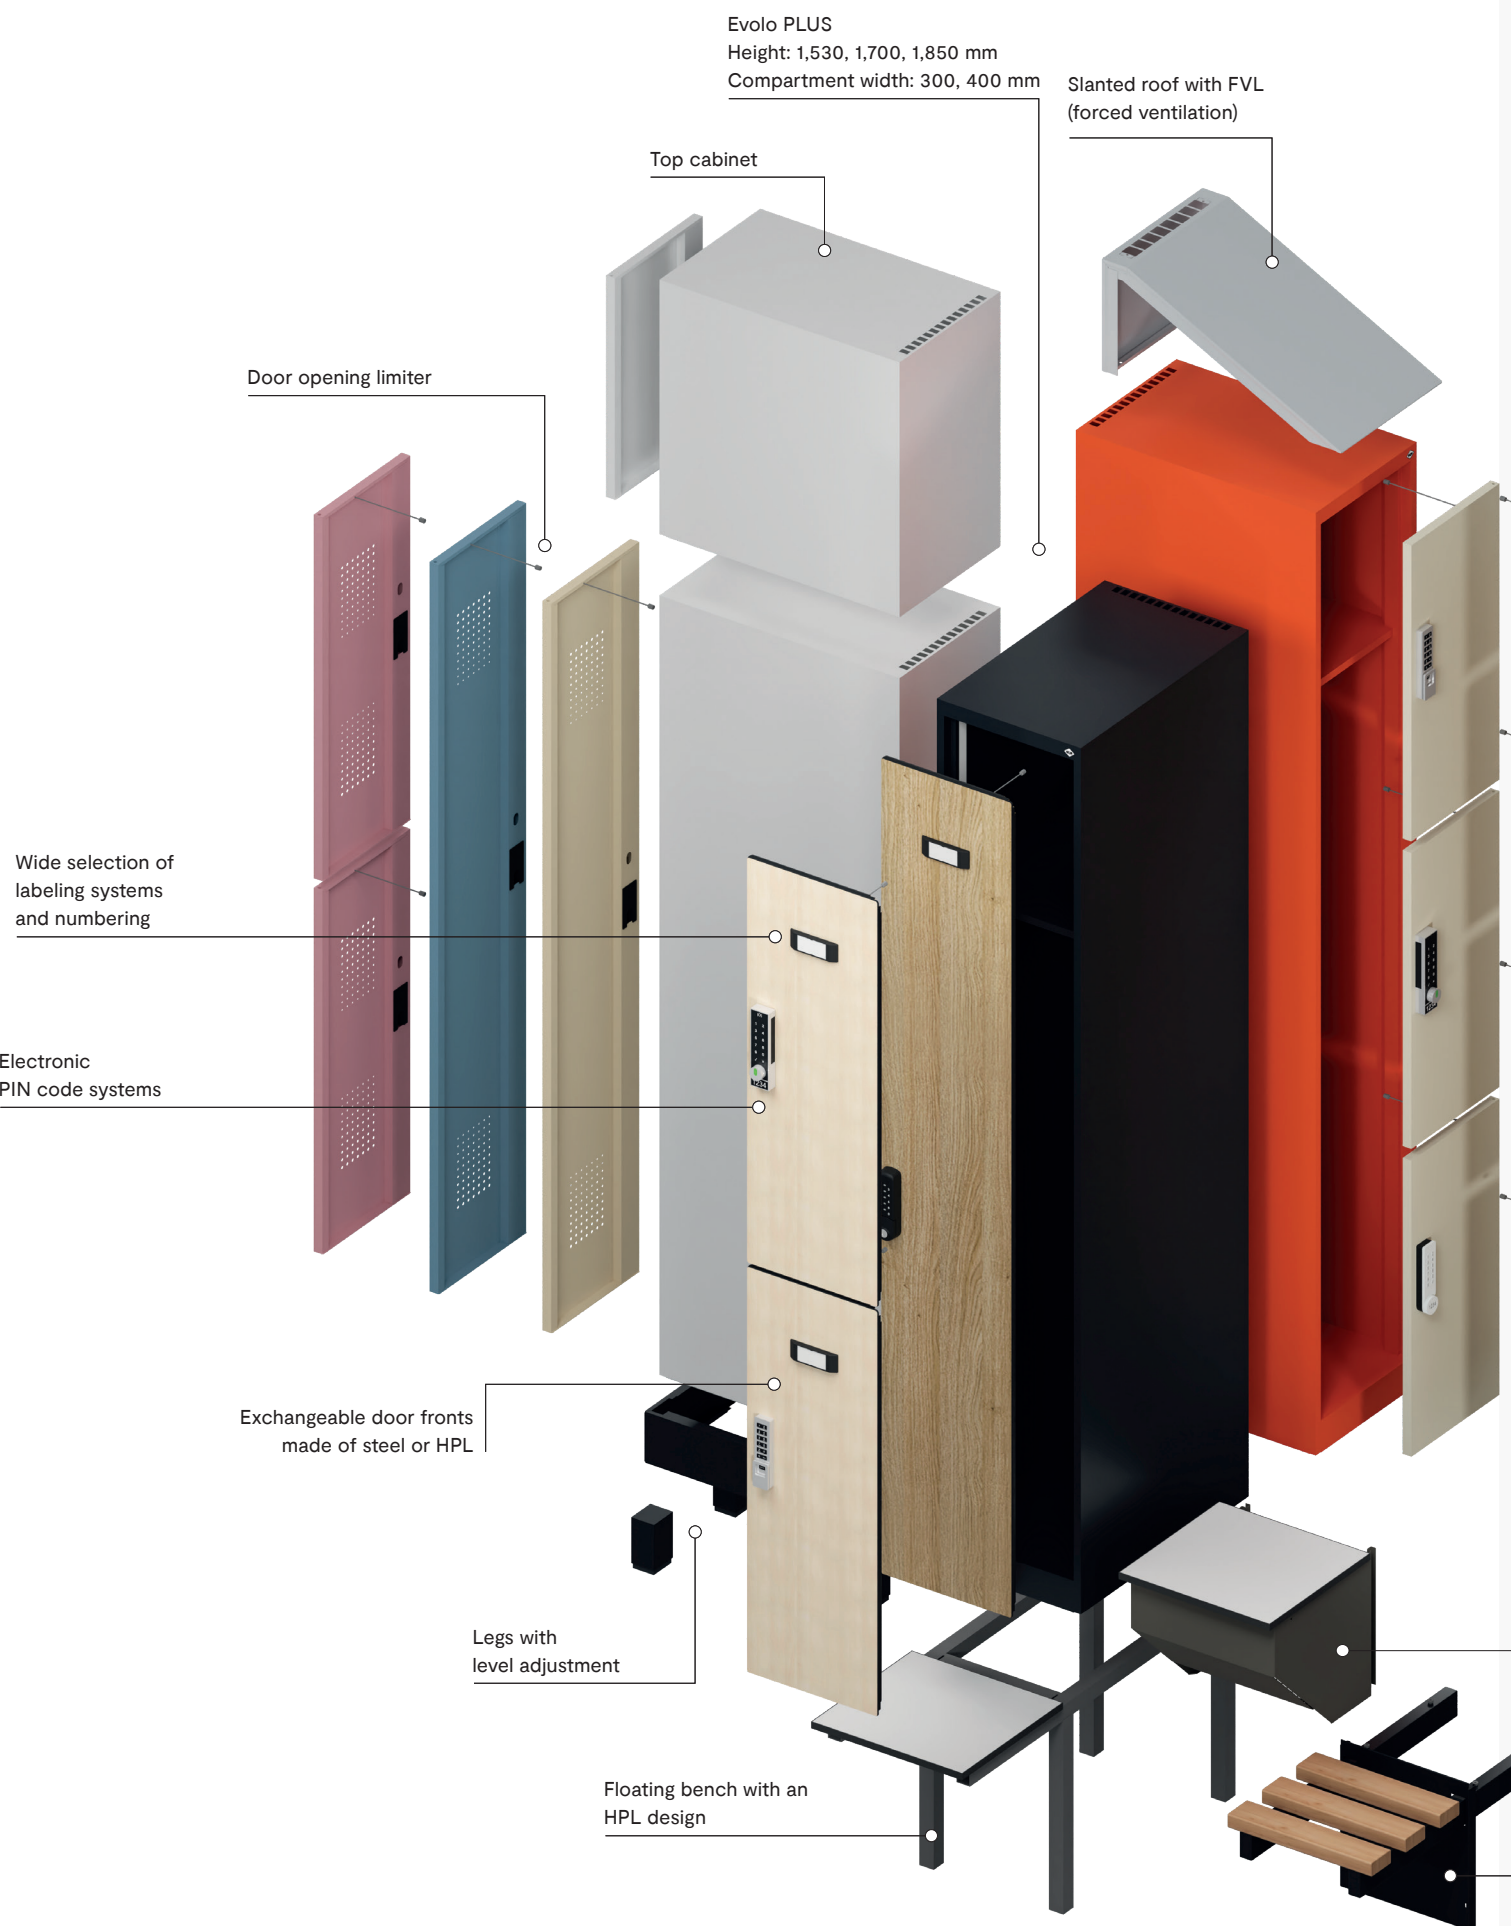

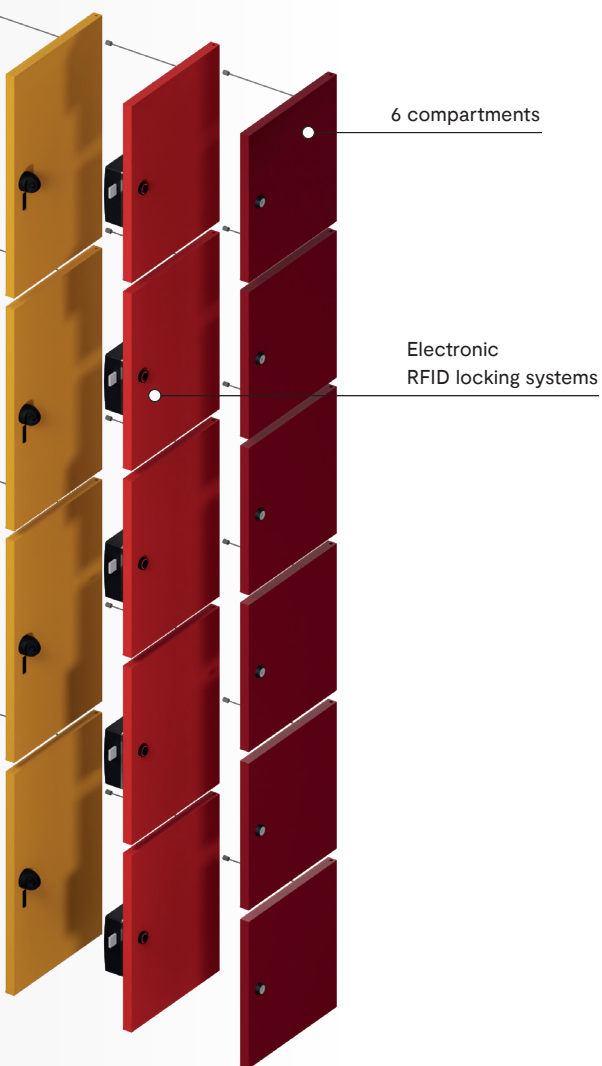

The picture shows the SAFE-O-TRONIC LS200 lock. The series enables 58 different closing variants in total.

Elegant arguments:

- + The all-rounder offers the most options
- + A design that is especially guaranteed to withstand attempts to break it open (DIN 4547 C)
- + The series includes 708 models to choose from
- + Choice of one, two, three and four compartments and 1–6 shelves on top of each other
- + Compartment width 300/400 mm
- + Special partitioning like Z lockers
- + Reflects modern color trends
- + Preassembled storage shelf and sturdy changing room rail made of oval profile with 3 anti-rotation double sliding hooks for each compartment
- + Smooth surfaces both outside and inside
- + Optional exhaust air technology (FVL system)
- + Inside corner slope per compartment as standard (used to accommodate special equipment or electrification elements)
- + Ventilation with a stylish hole pattern
- + Fronts: steel and HPL decor doors
- + Option of left / right-opening door
- + 90° door opening limiter as standard
- + Very sturdy door
- + Special safety turning bolt for padlocks
- + Electronic locking systems (RFID and PIN code locks, also wired) possible
- + Convenience options (including shoe box; acoustic elements and bag holders possible)
- + Legs in light gray with RAL 7035 as the body color; black gray finish with all other body colors
- + Level adjustment as standard for floor-standing, legs and base variants
- + 10-year manufacturer's warranty

Shoe / storage shelf
with an HPL design

Floating bench with slats
made of beech (plastic optional)

In a dimension of its own with respect to service too

As you have come to expect from C + P, with the new Stahlschrank PLUS series you also benefit from all the advantages that only a genuine full-range supplier can offer you. You can order all the cabinets with the matching locks or locking systems directly from a single source. You will receive expert planning support. You can easily reorder all kinds of components. Due to C + P's high quality standards, you incur practically no maintenance costs. And you will receive customized, expedient advice and support in every situation. Plus the following exclusive advantages.

C + P exclusives:

- + We have our own logistics planning facilities
- + We have our own trucks and drivers
- + Staff are trained to handle goods sensitively
- + Staff are trained to assemble the products quickly
- + For you, this means less effort and stress
- + For the environment, this means less packaging
- + EcoVadis certification: silver medal for sustainable action

Seeing × feeling × hearing

A full experience
for the senses.

In developing the new C + P PLUS series of steel cabinets, we have taken a little inspiration from the automotive industry, where it has long since been common practice for a product to not only look good, but also impress with features targeting the other senses. We achieve this effect with our cabinets by using the likes of high-quality embossed and punched materials that are a joy to touch – or by ensuring such precise and fine workmanship that the door closes with a muffled and pleasant sound.

Our models and features – a comparison

A consistent overall system also includes offering multiple equipment and price grades – so customers can get an idea of which solution fits their ideas best. The table gives you an overview of the current options for each model.
