

Der Stahlschrank.

What we offer.

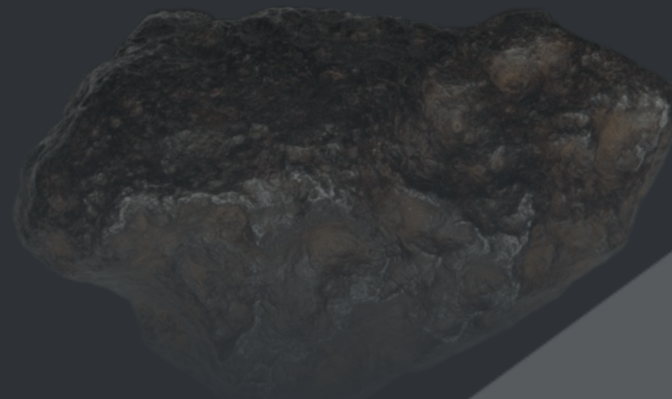

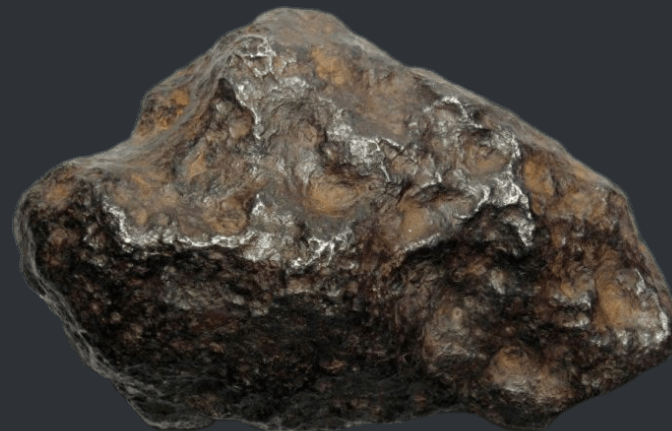

“Steel is in our DNA”

“Steel—an authentic, natural material that has been valued for centuries and possesses unique properties. Steel stands for strength, high load capacity, durability, and malleability.”

Steel as a Material: A Sustainable Allrounder!

Steel forms the basis of all our products. No other material offers such a wide range of positive qualities when it comes to the stability, design, and lasting value of storage furniture.

In addition, steel plays an important role in conserving resources. The material can be melted down and reprocessed for new purposes time and again without any loss of quality. Incidentally, half of the steel produced in Germany is now made from this secondary raw material..

Der Stahlschrank.

What we offer.

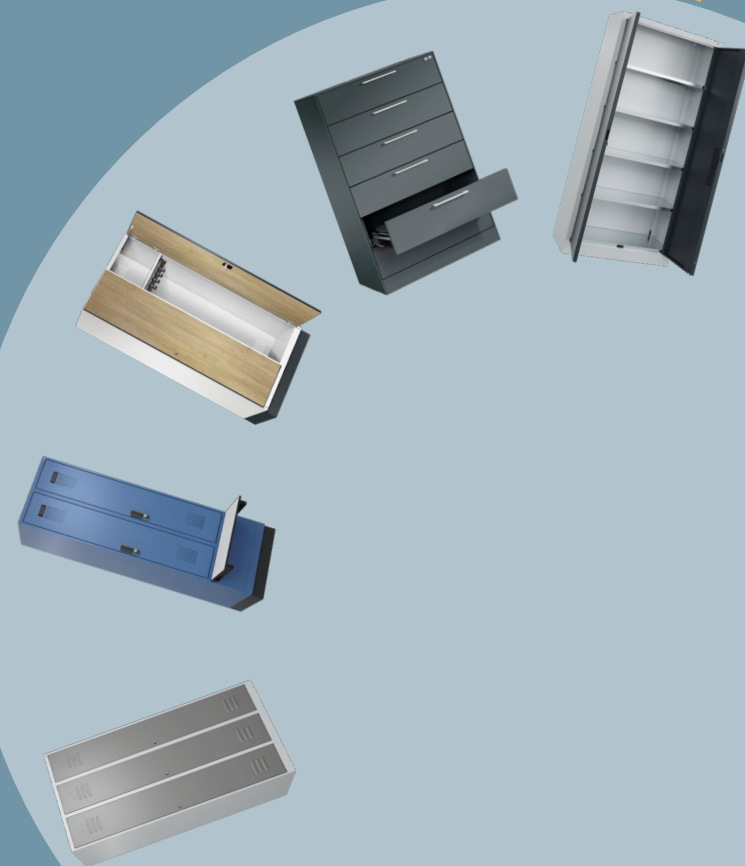

C + P Der Stahlschrank.

The original since 1925.

Christmann + Pfeifer (C + P) was founded in 1925 in Breidenbach, Hesse, and has been in business for nearly 100 years.

In addition to its corporate headquarters, C + P's production sites now include plants in Gotha, Thuringia, and Legnica, Poland.

What we offer.

Acurado Hinged-door cabinets

Store Tools and Equipment Properly.

Whether in workshops, industrial settings, or other technical facilities—with the right tool cabinet, you can bring more order and security to your daily work!

By properly sorting and organizing your equipment and tools, you can increase the efficiency of your workflows—even with heavy equipment.

With a tool cabinet and steel cabinet from C + P, we offer you top quality, professional advice, and reliable installation.

What we offer.

Asisto office cabinets

Strong as steel and flexible in the office.

Asisto by C + P is a leader in every aspect of modern office furniture and offers you additional, rock-solid benefits that you can only get from C + P.

That's because Asisto cabinets, with their innovative steel body, impress in terms of technology, design, and value for money. Asisto is the smart, complete range from the market leader in steel office furniture.

What we offer.

Cambio:

The metal locker offering a high degree of customization.

This elegant locker line is in a league of its own. The high-quality lockers & wardrobes in the Cambio series are designed to meet specific requirements and, thanks to their high degree of customization, blend harmoniously into a wide variety of spaces.

Common applications include fitness and wellness centers, swimming pools, medical facilities, and commercial changing rooms.

What we offer.

Evolo PLUS:

For industry, fitness, wellness, and sports.

Lockers & wardrobes from the Evolo series are primarily used in modern industrial changing rooms.

Thanks to their attractive design, they are also popular as furniture in the changing rooms of gyms, sports facilities, swimming pools, and wellness areas.

When arranged in rows, several Evolo steel lockers create a harmonious overall look, as they feature delicate, narrow sides.

What we offer.

Classic PLUS:

The classic locker.

The classic industrial locker has since found its way into many other areas of use. In doing so, it sets new standards as standard features.

Take, for example, the safety turning bolt, which spins freely when locked, preventing forced entry by over-turning.

Speaking of burglary resistance: You shouldn't settle for anything below Class B, the second-highest burglary resistance class according to DIN 4547-2.

What sets us apart.

Less is more!

BIONIC Steel Frame

For the new PLUS series of steel cabinets, C + P has developed a design that sets new standards in terms of stability and resource conservation. The models in the series are specifically reinforced at key points and feature a sophisticated internal structure of folds, struts, and spaces—similar to a tree leaf. The result: increased torsion resistance while using fewer raw materials and resources.

Der Stahlschrank.

What sets us apart.

Color in its most beautiful dimension

The C + P color concept

Gray-on-gray is a thing of the past. Today, it's all about literally bringing color into the picture—even in office spaces, schools, doctors' offices, and similar settings—whether through an eye-catching decorative front on a steel cabinet or furniture in contrasting colors. Work with C + P Möbelsysteme to find the perfect color concept for you.

What we offer.

Logistics with Service-PLUS

C + P's in-house logistics. With a total of 40 company-owned trucks and 80 furniture trailers, it ensures the on-time delivery of our steel furniture in a reliable, safe, and environmentally conscious manner.

Reliable and on time

C + P's in-house logistics department plans our deliveries centrally, with a focus on customer needs, and via the fastest possible route. Direct shipping eliminates the need for any transshipment.

Safe and Secure

Thanks to our proprietary loading system, our products are fully protected against any damage during shipping.

Comprehensive Services

As a standard practice, we deliver directly to our customers at a scheduled time and free of charge. This also includes advance notice of the exact delivery time.

What we set up.

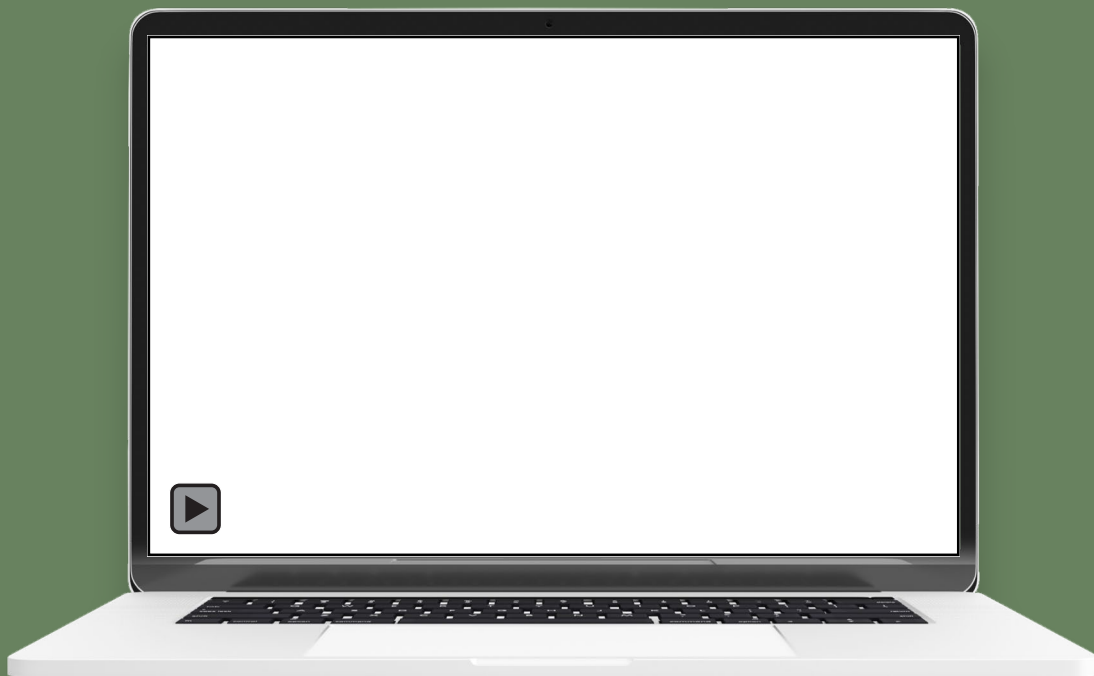

Planning and Consulting

We provide consulting services—drawing on our experience, expertise, and passion—to tackle challenges and, in doing so, develop solutions tailored to your individual vision. We find “The Way to Go” for every situation.

pCon Planning Support

Whether it's office furniture, changing rooms, workshop equipment, or outdoor transfer stations: We have a solution for everything! Our commercial design team creates customized plans based on your needs.

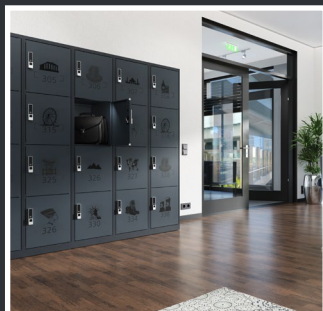

What we set up.

Solutions Tailored to EVERY Industry

Thousands of specialty retailers, companies, and institutions around the world rely on C + P's furniture solutions—from small craft businesses to large industrial corporations.

Der Stahlschrank.

Where we come from.

C + P Der Stahlschrank.

From the region, for the region.

The company, founded by Wilhelm Christmann and Otto Pfeifer in 1925, had its origins in a blacksmith's shop and metalworking shop in Wallau that manufactured sheet metal parts and architectural hardware. Soon after, the company moved to a larger site on the B253 between Breidenstein and Breidenbach, at the turnoff to Wiesenbach, where the construction of steel buildings became its core product.
