

WE KNOW WHAT YOU DO. AND WE KNOW WHAT YOU NEED.

When the alarm goes off, every second counts. That's when every motion has to be precise—and every piece of equipment has to be exactly where it's needed: secure, organized, with adequate ventilation, and immediately within reach.

C + P firemen's lockers—made for your missions.

Der Stahlschrank.

More than just a locker – the C + P firemen's lockers

Whether it's a volunteer fire department, a plant fire department, or a professional fire department—every second counts during an emergency. This makes it all the more important to store personal protective equipment in a well-designed, safe, and code-compliant manner. C + P firemen's lockers were developed in collaboration with users and offer maximum functionality, superior durability, and flexible solutions for every fire station.

Here's what the lockers & wardrobes offer:

- + **Built for heavy-duty use:** Sturdy steel structure with a high-quality enamel coating
- + **Well-designed interior fitting:** helmet compartment, security compartments, changing room rails, and multi-function hooks optimally combined
- + **High load:** Sturdy changing room rails and anti-rotation double sliding hooks
- + **Secure storage:** Lockable security compartments for personal belongings
- + **Flexible equipment:** Movable partitions, various compartment sizes, and configurations
- + **Customizable:** Wide selection of models, colors, and configurations
- + **Developed for real-world use:** Optimized in collaboration with firefighters for real-world operations

Efficient Ventilation:

Foldable helmet holder with built-in ventilation, compatible with all standard EU helmet sizes—no adjustment required.

Optimal corrosion protection:

Standard zinc-plated bottom components and corrosion-protected bases ensure maximum durability in daily use.

High load capacity:

Double sliding hooks with high load capacity and mounting options for partitions or coat hangers—versatile in use.

Fast drying:

A special coat hanger prevents wrinkles and ensures faster drying through optimal air circulation.
